

## WGC ECONOMIC PROGRAMS

# V. Economics of Mega Projects

## DESCRIPTION

This program aims at providing participants with the knowledge related to the mega projects currently being developed in Egypt. It highlights how those projects are designed, managed, financed, and controlled. The program will shed the light on the 5 largest projects in Egypt and what kind of structured finance is required to leverage their performance. Discussions include the importance of this kind of projects, their feasibility, if they are considered priorities and their value and/or non-value added.

## OBJECTIVES
