

## WGC ECONOMIC PROGRAMS

# I. Economy In-A-Box

## DESCRIPTION

Economy In A Box relates macro-economic changes to what is occurring on the ground in addition to the implications those changes might have on the banking industry. The program illustrates and analyzes the topography of the Egyptian economy, its current status quo, trends, and challenges. It shows how to work around those challenges and grasp the possible opportunities for a reliable and sustainable development. Areas covered include fiscal policies, monetary policies, investment policies, and industrial policies

## OBJECTIVES

- Acquaint participants with the Egyptian strategy and economic policies, trends, and structure.
- Understand the current economic status-quo & the challenges lying ahead.
- Enrich participants general economic knowledge.
- Understand new trends in economic policies with special focus on reading the economic scene.
- Learn how to co-relate economic issues with banking topics.
